PDA devices are great for mobile information management. But entering and retrieving data and executing commands using your handheld's native controls can be time-consuming and inefficient. Wouldn't it be convenient to use the keyboard and screen of a full-sized PC to input and view data on your portable device?

Now you can, with Laplink Controller for Palm and Pocket PC devices!

Laplink, the expert in remote access technology, brings you Laplink Controller, an application that offers complete and convenient remote control for any Palm or Pocket PC device.

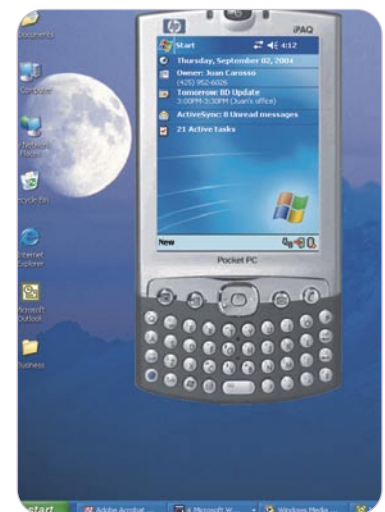

This indispensable productivity tool lets PC users view and control most Palm or Pocket PC devices on a desktop or notebook screen. Now you can enter and retrieve data stored to your mobile devices with the convenience and ease of a full-sized screen and keyboard.

Laplink Controller is also a valuable presentation and training tool. By projecting your PDA's screen onto a desktop or notebook, you can comfortably display the contents to a small group of people. And if the desktop or notebook is connected to a projector, your tiny hand-held can actually power a large-scale presentation!

Laplink Controller can also create video recordings for software training and demonstrations, print PDA screens, and synchronize the clipboards of the user's desktop or notebook with their handheld device for data copying.

Key Features:

- **Skin Views:** View your Palm or Pocket PC in a device skin. Skins for most PDAs and other popular devices such as Smartphone are available.
- **Screen Captures:** Capture and save PDA screens.
- **Integrated Clipboard:** Transfer data between your PDA clipboard and the desktop clipboard with Integrated Clipboard.
- **Clipboard Synchronization:** Synchronize desktop and mobile device clipboards.
- **2 View Modes:** View PDA screens in portrait or landscape modes.
- **Activate/Stop Controls:** Activate/Stop applications and processes and view detailed process information, such as DLLs loaded and thread information.
- **Desktop Access:** View PDA utilization and system information from your desktop computer.
- **Automatic Start/Stop:** Start/stop automatically when you dock/un-dock your PDA.
- **Language Support:** Get support for English, French, German, Portuguese, Spanish, Swedish, Danish, Finnish, Dutch, Norwegian, and Italian keyboards.
- **Presentation Mode:** Use solid color or HTML backgrounds with Full Screen Background Mode; ideal for presentations.
- **Print Options:** Print screens with WYSIWYG accuracy in 1X, 2X, 3X, landscape, or in a skin.

System Requirements for Pocket PC devices

- Windows 95/98/NT/Me/2000/XP
- ActiveSync 3.0 or later

System Requirements for Palm devices

- Windows 98 or later
- Microsoft .NET Framework 1.1
- Palm OS Hardware
- OS 4 or OS 5
