

# LAPLINK®

## GOLD CORPORATE

File Transfer, Synchronization, Remote Desktop

### NEW in

## LapLink Gold Corporate

### NEW Centralized Address Book

New in LapLink Gold Corporate you can have the address book stored centrally on the network in a SQL database. With built-in authentication, only authorized users will be able to use it.

### NEW Enterprise Push Install

Deploy LapLink Gold Corporate across the enterprise using the new easy-to-use Enterprise Configuration Wizard.

### NEW System Information

LapLink Gold Corporate can retrieve system information from remote computers to help with troubleshooting.

### NEW Remote Snapshot

LapLink Gold Corporate has the ability to take and save screenshots from the remote machine. A simple-to-use thumbnail view makes it even easier to sort through all the images.

### NEW Firewall Support

Ensure secure connections to computers behind firewalls with LapLink's new automatic Firewall Connection Service

## Integration with LapLink Everywhere

### Free Trial

Included in new LapLink Gold Corporate is a 30-day free trial of Laplink Software's remote access tool, LapLink Everywhere.

### Firewall Support

Ensure secure connections to computers behind firewalls with LapLink's new automatic Firewall Connection Service

### Access from Anywhere

LapLink Everywhere gives you the ability to access your PC via any web browser including PDAs, and mobile phones!

## Access Your PC and Transfer Your Files from Virtually Anywhere

*LapLink Gold Corporate is the latest release of our award-winning, robust all-in-one communication solution for the enterprise. It gives you the ease of quick access to a desktop PC to tap into all of your network resources. Access files, synchronize data between PCs, run database applications, operate, maintain and even reboot PCs or servers – you can do it all remotely with this single application!*

Whether you're just transferring files between two machines or managing an enterprise of computers, LapLink Gold Corporate offers you the flexibility to work the way that best fits your needs.

Our latest release continues to raise the standard for PC-to-PC connectivity including enhanced Internet functionality; ultra-fast, always safe file transfers; security levels you control and convenient compatibility with any Windows PC including Microsoft's newest operating system, Server 2003. It will give you a level of mobility, independence and control you may have never thought possible.

## LapLink Gold Corporate Highlights

### Full Spectrum Windows Compatibility

Effortlessly work across varied Windows environments with support for Windows 95, 98, NT 4.0, 2000, Me, XP and Server 2003. Use LapLink Gold Corporate to migrate from an old PC to a new PC!

### Take Advantage of the World's Largest Network

LapLink Gold Corporate ensures an easy, safe and reliable way to connect to your office or other remote computers to run any desktop application. Connection options include the Internet, TCP/IP or IPX networks, Dial-up Networking, LapLink high-speed USB cables, LapLink serial cables, modems and LapLink parallel (Win 95/98/Me only).

### Security to Safeguard Your Data

Control access to your PC's drives and folders with Folder-Level Security. Protect your data during transmissions with Multi-Level Encryption (including Microsoft's CryptoAPI support). Thwart repeated attempts to guess your password with Case-Sensitive Passwords and Lockout Protection. Use our Address Book to build an Access Control List for those with permission to access your PC.

# LAPLINK<sup>®</sup>

**GOLD CORPORATE**

"LapLink's file-transfer skills remain the best of any remote control app we reviewed synchronizing folders and files on the two machines is a breeze."

- C/NET

"The bottom line: LapLink offers terrific file transfer and remote-control features. It can't be surpassed when it comes to reliability and ease of configuration and use."

-InfoWorld Test Center

## What Remote Control offers you:

- Administer and even reboot remote servers across a network or over the Internet
- Streamline support by taking over and operating a remote PC
- Use the remote control connection for simultaneous voice or text messaging while helping users
- Access network-based applications and databases from anywhere

## LAPLINK

LapLink Gold 12 communicates with LapLink Gold Host, the perfect remote support tool for end-users, to provide remote systems administrators' user support, repairs and training. For more information on LapLink Gold Host volume licenses, visit [www.laplink.com/vla](http://www.laplink.com/vla)

## System Requirements

MS Windows 95/98/NT4.0/2000/Me/XP/Server 2003  
24 MB RAM (32 recommended)  
23 MB of hard disk space

## Award Winning Recognition

Winner of Mobile Computing's First Class Award  
Four Years in a Row!

## Speedy File Transfers and Updates

Enjoy lightning-fast transfers of any file type with our patented SpeedSync™ technology that transmits just the updated portion of files. Boost your productivity: Schedule automatic, unattended file transfers and connections to an ISP, and use SmartXchange™ to instantly synchronize multiple folders without complex scripting.

## Support Users Without Leaving Your Desk

Effortlessly manage remote users or servers and trim your interoffice, cross-town or cross-country travel with LapLink Gold Corporate. Use our intuitive remote control capability to operate, maintain, reconfigure and even reboot PCs and servers at a distance. You can even use the same connection for Text or Voice Chat while you're at it.

## Conveniently Access Network Resources

Tap into network resources by using a remote control connection to a networked PC. Access all of a PC's local and network drives with a simple file transfer connection. Print items stored on your home PC on your office printer, or vice versa, with two-way print redirection. Use the optional LapLink USB Network cable to access network resources when connected to a networked PC without a network interface card.

## High Speed Data Cables

In addition to directly connecting via serial and parallel cables, the fastest way to connect two computers is by using the LapLink USB 2.0 transfer cables. Now with speeds up to 100Mbps, the USB 2.0 cables guarantee a secure and fast connection.
